

SupEr Kidzee

**Coding
is NextGen
Superpower**

About SupEr Kidzee Program

SupEr Kidzee is an initiative to inspire children with Age 7 to 16 years to explore and use their creativity to learn coding with a Passion for Technology by our experienced Tutors spread across the world.

Mission

Our mission is to educate the next generation of kids who will use their coding skills and knowledge to make the world a better place.

What we do

- Super Kidzee is an online kids' coding academy that teaches kids to create games, animations and stories using block-based programming.
- Super Kidzee virtual classes are tutor oriented and includes hands on programming languages which are supplemented by projects and exercises for Kids.
- We have curated a curriculum with best global practices. Our one-student-one-coach approach brings out the best in the student, while having fun.
- Our goal is to create a generation of young programmers, designers, and entrepreneurs who can build amazing games, apps, and more.
- Our courses are curated to teach kids not only how to design and code, but to thoroughly understand the concepts of coding so that they can build apps on their own.
- By making computer programming incredibly fun and engaging through game design, Super Kidzee students will develop the motivation and tenacity to learn to code with actual development ecosystem and real-world skills.

Our Core Values

- We thrill Kids and Gratify Parents
- We create fun and instil creativity in Kids
- We promote growth and learning with coding, gaming, and education
- We build open and transparent relationships with effective communication
- We consistently improve on our processes and teaching methodology
- We discover innovative ways to teach coding
- We are committed and stand by our words
- We believe in giving back to Society

At end of Program, they will learn

- Game Designing
- 3D Character Designing
- Artificial Intelligence
- Storytelling and animation
- Android Mobile Application Development
